

José María Lozano Olmedo

Data Scientist

ABOUT ME

I'm a Data Scientist looking for new challenges to continue growing. Hard work, effort, good attitude and commitment are some of my qualities. I love everything related to data and I have learned by my own many different contents to improve.

EDUCATION

University of Valladolid

Computer Science degree specialized in Software Engineering

September 2019 - July 2023

University of Valladolid

Master in Computer Science

September 2023 - July 2024

This master focuses on more complex aspects of data such as Deep Learning, BigData, Artificial Intelligence and Scalable Data Analysis Techniques as well as strategies for successful Project Management.

EXPERIENCE

Indra Minsait

Internship working as Software Engineer

February 2023 - July 2023

Indra Minsait

Software Engineer

July 2023 - July 2024

My tasks are to carry out deployments, manage a small team, communicate with the client, analyze information stored in a database and create scripts to generate organized data.

SEGULA Technologies

Data Scientist

July 2024 - At the moment

My tasks are to help in the analysis of the data obtained from Renault cars from different experiments to detect patterns and be able to justify the appropriate measures for their calibration.

ABILITIES

I'm specialized in Data Science and I'm interested in Artificial Intelligence, Machine Learning, Deep Learning and BigData. The technologies that I most use are Python, R, PowerBI, Matlab, MongoDB, Tensorflow, Keras, Tableau, SQL and Spark.

PROJECTS

I have made my portfolio to publish all my projects. I invite you to enter my portfolio and review my projects. The link is <https://chemiya.github.io/>. On the other hand, I did my own Data Science bootcamp with udemy courses
